

Form of Proposal

Bids should be in writing and submitted on standard form of proposal as prepared by the Architect or Engineer. A copy of the bid form should be bound in the contract documents. It should not be necessary for the bidders to attach bulky contract documents as a part of the proposal or to make copies of contract document items.

Extra unbound copies of the form of proposal should be furnished to the bidders to facilitate submission of the bid.

Alternates should be limited to major items absolutely essential to the awarding of the Project (See Article 12, Alternates).

Price breakdowns, unit price or other information schedules should not appear on the proposal but should be negotiated with the successful bidder
