IOWA CONSTRUCTION INDUSTRY SAFETY CONFERENCE

February 1, 2010

9:00 am - 4:30 pm

Polk County Convention Complex

501 Grand Avenue

Des Moines, Iowa

One day – four sessions – you choose what is right for you.

Each session has five options from which to choose. The registration fee entitles the participants to choose the combination that provides the best value for you.

Registration Fee

\$85.00 per person

(Fee includes: Safety Awards Breakfast, Admittance to all four sessions, lunch and reception)

Held in conjunction with the Iowa Construction Industry Convention

— Celebrating Excellence in Construction —

IOWA CONSTRUCTION INDUSTRY SAFETY CONFERENCE

All training is designed to meet or exceed current OSHA and Federal Regulations and Guidelines.

Safety Awards Breakfast 9:00 - 10:00 a.m.

The Iowa Construction Industry Safety Conference will begin with an opening breakfast with special guest keynote speaker Mark Farley, Head Coach for the University of Northern Iowa. The Outstanding Safety Achievement Awards will also be announced during the opening breakfast to an MBI General Contractor and an MBI Specialty Contractor.

Sponsored By  **AFR**
AROLD FAY ROSENBERG, INC.
BEYOND INSURANCE

Session I • 10:00 – 11:00 a.m.

Duty to Have Fall Protection Systems

This program will identify specific conditions where fall protection procedures are a requirement. In turn, this will assist you in the selection process to determine the best protective system for providing the proper fall protection for your workers in the workplace.

Phil Mercuris, Master Builders of Iowa, Des Moines, Iowa

OSHA's Safe Procedures for Entering Confined Spaces for Construction

Do you understand the true definition of a confined space for the construction industry? Are you following proper safety procedures when entering a confined space? Come and learn how to safely enter a confined space to prevent a tragic accident from happening on your jobsite.

Ken Arp, Iowa OSHA Consultation Division, Des Moines, Iowa

Identify Hazardous Materials on Your Construction Project

This is an overview of the types of hazardous materials found in buildings that may affect worker health and OSHA compliance requirements. Examples are asbestos, lead, mercury, the new hexavalent chromium standards and others. The review includes the reasons for concern (employee exposure regulatory), how the materials are identified, and how such materials can impact building projects.

Cindy Baldwin, Terracon Consultants, Inc., Cedar Rapids, Iowa

Stay Safe from Electrical Hazards

The electrical presentation will focus on real life day to day safety concerns and suggestions on how to eliminate potential accidents and OSHA fines. A demonstration will be presented on the effects of electrical burns to the skin and how what you wear can affect your injury.

Ruben Bera, Commonwealth Electric, Omaha, Nebraska

DOT Rules for Drivers / Equipment Securement

When does the driver of a pickup pulling a trailer need a CDL? How about a Medical Examiners Certificate? A Daily Vehicle Inspection Report? If you know the answers to these questions, you may be hours ahead of the competition in getting to your jobsite. This session will focus on basic requirements that owners and drivers of commercial vehicles, big and small, will encounter. Topics will include a review of interstate and intrastate rules on proper licensing of the driver, drug and alcohol testing, driver qualification, daily vehicle inspections, hours of service and cargo securement. Bring your questions, the Gross Vehicle Weight Ratings from your trucks and trailers and your interest in compliance with the latest highway safety rules.

Chris Boswell, Department of Transportation, Des Moines, Iowa

Session II • 11:30 a.m. – 12:30 p.m.

Safety Leadership

What kind of leader are you? We all know that creating a safe work environment is critical in preventing injuries. In order to increase our safety success rate we must have leaders that demonstrate the attitudes and skills that influence the safety behaviors of our crews. Safety leadership is not just for the forman or supervisors, safety leadership includes all employees at all levels. This session will discuss the type of leader you are and how you can become a better more efficient leader in promoting the safety message.

Chuck Martinek, LaMair-Mulock-Condon Co., West Des Moines, Iowa

IOSHA New Inspection & Emphasis Program for Construction

This program will inform you on how OSHA conducts inspections and specific emphasis programs that mandates OSHA to conduct inspections in the construction industry. Everything from how OSHA selects the site to inspection procedures. This is an opportunity to ask questions about OSHA requirements that you have always wanted to ask.

Jens Nissen, Iowa OSHA, Des Moines, Iowa

Scaffold Inspection Procedures for the Competent Person

One of the most important aspects of scaffold safety is the inspection process. This seminar is designed to assist the user and competent person in making proper scaffold inspections. Subjects covered in the seminar include: competent person responsibility, scaffold users responsibility, what to look for in the inspection process (ground conditions, electrical, bracing, planks, fall protection, access), when to inspect, and how often. Attendees will receive a checklist to assist them in proper scaffold inspection.

Merle Errthum, Seedorff Masonry, Inc., Strawberry Point, Iowa

The Principles of Safe Rigging

Discussion will focus on the safe use, inspection, and care of rigging equipment. Construction styles and configuration will be presented and discussed. We will also cover the pros and cons in different applications, as well as the inspection process and removal criteria for each item being presented.

Phil Herra, Rockford Rigging, Inc., Roscoe, Illinois

Traffic Safety Awareness

What causes traffic accidents? Bad brakes, flat tires, poor road conditions? Sometimes mechanical failure and the weather can contribute to accidents however; it is more likely that inattentiveness, complacency and poor driving habits are to blame. Learn how to identify and correct bad driving habits through this driver awareness training seminar to reduce the risk of an on the road accident.

Steve Duff, Ahrold-Fay Rosenberg, Des Moines, Iowa

Safety Luncheon 12:30 - 1:30 p.m.

Main Level Front Lobby (Grand Ave. Entrance)

Sponsored By  **usbank**
Five Star Service Guaranteed

Session III • 2:00 – 3:00 p.m.

Fall Protection Equipment: Proper Use & Inspection

The number one cause of fatalities in the construction industry is due to fall hazards. This seminar will cover the proper use of fall protection equipment and equipment inspection procedures. OSHA requires training for workers to understand the proper procedures for fall protection.

Jeff Springer, Process Marketing Group – DBI/Sala, Omaha, Nebraska

Safe Operation of Forklift & Skidsteers

Every year there are serious accidents that occur because of improper operator operation. The program is designed to emphasize the importance of using the equipment in a safe manner, equipment safety inspections and safety devices.

Dan Hutton, Star Equipment, Ltd., Des Moines, Iowa

Charlie Bowman, Star Equipment, Ltd., Des Moines, Iowa

OSHA Trenching & Excavation Requirements

If proper safety procedures are in place for trenching and excavating no workers would be injured or lose their life while working in these types of locations. Safe procedures and inspection will be the main focus for this session . . . Let's save lives!

Eric Juhl, United Rentals, Grimes, Iowa

Best Safety Practices for the Construction Industry

During this session you will learn some of the best safety practices for the construction industry. These best practices will help shape your company's safety culture. From methods of new hire orientations, safety audits and organizing a safety mind-set by implementing zero injury philosophy. Legendary coach John Wooden once said, "Failure is not fatal, but failure to change might be."

David McInroy, Merit Construction, Cedar Rapids, Iowa

2009 Winner (GC) – MBI / IOSHA Outstanding Safety Achievement Award

Merle Errthum, Seedorff Masonry, Inc., Strawberry Point, Iowa

2009 Winner (Sub) – MBI / IOSHA Outstanding Safety Achievement Award

Preplanning Makes for Safe Sites

Project planning is something we all do. Some plan before beginning work, some plan as work progresses and others do a combination of both. Productivity and safety are the primary focus of all plans. Facility owners, General contractors and subcontractors have the ability to identify and implement solutions to safety concerns before releasing employees to perform the work. Reducing the need for problem solving while working, and enhancing safe production while a facility is under construction as well as when performing routine maintenance that falls within the General Conditions of an occupied facility.

Kenny Thrap, Waldinger Corporation, Des Moines, Iowa

February 1, 2010

9:00 am - 4:30 pm

Polk County Convention Complex
501 Grand Avenue
Des Moines, Iowa

Held in conjunction with the
Iowa Construction Industry Convention

Session IV • 3:30 – 4:30 p.m.

Key Elements in Conducting a Jobsite Safety Inspection

The construction jobsite audit can be a critical tool for keeping your projects on time and under budget. Find out tips for what areas are the biggest hazards on a construction site and also identify what OSHA has been looking for during their inspections. Ongoing attention to safety is the ounce of prevention that is worth a pound of cure.

Ryan Hoenicke, Master Builders of Iowa, Des Moines, Iowa

The Industrial Athlete

The physical demands in the construction industry can be great, and the injury bug can infect many companies. The costs associated with work-related musculoskeletal disorders continue to rise, which can put a company at a competitive disadvantage. In this session, physical therapist Troy Vander Molen will teach you about the ABC's of work injury prevention. His session will focus on a comprehensive approach to reduce injuries, enhance productivity, and improve the bottom line with a special emphasis on the Industrial Athlete Model.

Troy Vander Molen, Work Systems Rehab, Des Moines, Iowa

Supervisor Drug Awareness Training in the Workplace

Companies that have drug testing programs are required by the State of Iowa to have at least 1-hour of drug awareness training for their supervisors each year. Attendees at this presentation will be informed of the impact of substance abuse as related to the workplace, signs and symptoms associated with common drugs of abuse.

Dr. Tricia Harlan, Onsite Testers Company, Des Moines, Iowa

Safety Awareness for Scissor & Aerial Lift Operators

Equipment operators must understand and practice safe procedures when operating equipment. This session is designed to point out the importance of machine walk around inspections, machine functions, testing general jobsite safety conditions and OSHA regulations.

Jim Philips, United Rentals, Grimes, Iowa

Transforming Your Company's Safety Culture

Learn how senior management involvement personal safety commitments, partnering with subcontractors and suppliers, personalizing the safety message and having zero tolerance for violations can transform your company's safety culture and lead to safety success.

Mark Green, The Weitz Company, Des Moines, Iowa

Safety Conference Closing Reception
