Lead-Safe Renovator Training

Are you certified?

All contractors performing work that disturbs lead-based paint in homes or facilities where children under age 6 are present have to be state certified and have a Lead-Safe Renovator oversee the work.

Complete this EPA-accredited training course to get certified!

As of April 22, 2010, EPA regulations became effective that require specific duties of those doing renovation, remodeling and repainting (RRP) in child-occupied structures built before 1978. One of those duties is to have a **'Lead-Safe Renovator'** on site. This individual **must be certified** by the Iowa Department of Public Health (IDPH), who requires successful passing of an 8-hr. course before application is made.

Renovation, remodeling and repainting activities include removing painted components such as doors and windows, repairing painted surfaces or preparing it for repainting, replacing windows and removing walls and ceilings. **Anyone who disturbs a total of one square foot of paint in any type of housing structure or any child-occupied facility, like a daycare or kindergarten room, built before 1978, comes under the requirements of the regulations.** If you will be doing work that meets the above definition, then you need to send someone to this class.

TOPICS COVERED WILL BE

- Background information on lead
- Health effects of exposure to lead
- Regulation
- Worksite preparation
- Conducting interim controls
- Worksite clean-up

SPACE IS LIMITED

Registrants will be accepted on a first-come, first-serve basis.

Cancellation Policy

If you must cancel your registration, a full refund will be granted to requests received in writing fourteen (14) days before the training date. No refunds will be granted for cancellations made less than this allotted time.
