Session 3 - 8:00 am - 3:00 pm

IOWA CITY

DECEMBER 14, 2017

Session 1 - 8:00 am - 12:00 pm

Session 2 - 1:00 pm - 5:00 pm

DECEMBER 15, 2017

Session 3 - 8:00 am - 3:00 pm

BLUEPRINT READING FOR COMMERCIAL CONSTRUCTION

A THREE PART SERIES

Construction drawings can be difficult to understand and mistakes can be costly. Being able to read and understand construction drawings is a fundamental skill for anyone involved in the construction industry. In this series, participants will gain the skills necessary to read and understand typical construction documents - blueprints and specifications.

SESSION #1: GENERAL CONSTRUCTION / CIVIL / PROJECT DELIVERY METHODS

This session will provide the participant with an introduction to the life cycle of a construction project from project conception, through design, construction, and project closeout. Participants will learn about project delivery methods, such as the traditional Design-Bid-Build, as well as alternative delivery methods, including Design-Build and Construction Management. Roles of the various parties in each delivery method will be discussed: owner, architect, engineer, contractor, and subcontractor.

Participants will engage in class exercises introducing them to contract documents, including construction plans and specification reading. Civil Plan reading topics to be discussed include the following:

- Standard symbols, plan organization, code analysis plan
- Civil Engineering Benchmarks, elevations, notes, scales
- Site utilities, such as domestic water lines, storm sewer, and sanitary sewer
- Existing conditions and new work
- Grading and pollution prevention plan
- Landscaping plan

ECOLOGICAL

PROJECT MANAGEMENT

The Master Builder designation program will offer various credits for completion of these sessions. For more information on becoming a 'Master Builder', please visit MBI's website at www.mbsonline.com/master-builder-designation

SESSION #2: ARCHITECTURAL / STRUCTURAL

This session will focus on the reading and use of architectural and structural plans and specifications. Architectural and structural plan reading topics to be discussed include the following:

- Standard symbols, plan organization, specification organization
- Use of standard architectural scales
- Architectural plan views, details, elevations, and sections
- Use of architectural schedules, notes, and symbols
- Structural foundation plans
- Plan reading for structural building systems, including precast concrete, structural steel, site cast concrete, and masonry

PROJECT MANAGEMENT

PRESENTED BY
BRAD PERKINS
CONSTRUCTION ENGINEERING
IOWA STATE UNIVERSITY

Mr. Perkins graduated from the ISU Construction Engineering program in 1997. He has worked at Black & Veatch in Overland Park, Kansas, ACI Mechanical in Ames, Iowa, and KJWW Engineering in Des Moines, Iowa. In 2001, he passed the Iowa PE exam, and is a licensed professional mechanical engineer. Some of the larger projects that Brad has worked on include the Lungmen Nuclear power plant (Taiwan), Valley High School remodel (Des Moines), State of Iowa Laboratory (Ankeny), and Allied Insurance Building (Des Moines).

SESSION #3: PLUMBING / MECHANICAL / ELECTRICAL

This session will focus on the reading and use of mechanical, electrical, and plumbing plans and specifications. Plan reading topics to be discussed include the following:

- Standard symbols, plan organization, specification organization
- Mechanical systems, equipment, ductwork, and schedules
- Plumbing systems, equipment, piping, and schedules
- Electrical systems, equipment, wiring, conduit, one-line diagrams, and schedules
- Electrical site plan
- Mechanical, plumbing, and electrical details

PROJECT MANAGEMENT
