

2018 BLUEBEAM REVU

AN ELECTRONIC TRAINING SERIES

Made for Today's Design and Construction Projects

Tighter budgets. Shorter timelines. Designing, engineering, bidding and building are more challenging than ever. So Bluebeam® Revu® has evolved, to keep you a step ahead. Bluebeam Revu 2018 fits seamlessly into your existing workflows, helping you access and share critical project information more efficiently—and complete your projects faster.

THIS IS A GREAT OPPORTUNITY TO SAVE MONEY AND TRAIN YOUR EMPLOYEES ON THE BLUEBEAM REVU SOFTWARE! CONNECT TO THESE ONLINE TRAINING SESSIONS FROM YOUR CONFERENCE ROOM TO TRAIN ALL OF YOUR EMPLOYEES FOR ONE LOW REGISTRATION FEE.

FEATURES & HIGHLIGHTS OF BLUEBEAM REVU 2018

CREATE

Revu gives you the power to turn Microsoft Office documents and CAD drawings into PDFs with one mouse click, and that's just the beginning. Batch convert unlimited Windows files to PDF, or 10 other file formats. Export scanned PDFs as editable Office documents. Assemble PDF packages for easy access to multiple PDFs, and transform scanned images into text-searchable documents.

COMMENT

Point, click and release is all it takes. Markup PDFs with Revu's customizable markup tools, including text, notes, clouds, CAD symbols, stamps and highlights, and save custom markups in the Tool Chest for easy reuse. Embed photos and videos into markups for added clarity. Track all annotations in the integrated Markups list, which can be filtered, organized, customized and exported to Excel.

COLLABORATE

The Bluebeam Studio Platform helps teams and organizations manage projects anywhere—regardless of Internet access. Upload and share an unlimited number of PDFs and any other file type to the cloud or on your own server. Access these files to collaborate on the same 2D and 3D PDFs in real time, or any time, with project partners around the world. There are no limits to what you can do when leveraging the combined powers of Revu and Studio.

ORGANIZE

Do more with your PDFs. Easily edit PDF content by adding, deleting or rotating pages. Create bookmarks from page labels or PDF content instantly, quickly generate unlimited hyperlinks by name, page label or page region, and automatically slip-sheet large document sets. Search PDFs for keywords or symbols and electronically compare document revisions.

PRESENTER

SCOTT KOENIG

Scott has almost 20 years of training experience. Scott came to Bluebeam in August 2015 after spending 18½ years training at ADP. As a Senior Specialist in the Training and Development group, he currently works with clients leading interactive classes on the basics of Revu as well as advanced workflow trainings. Scott also works as a trainer with the Bluebeam Certified Instructor program where he leads classes that teach clients and resellers to train on Revu. Scott's favorite part of being a trainer is that light-bulb moment that people get when they learn something new and it makes sense.

2018 REVU BASICS • OCTOBER 2, 2018 • 10 AM - 12 PM

This session is designed to introduce new users to the core features of Bluebeam® Revu. You will learn the foundational skills necessary to organize, markup, edit and track comments in a PDF drawing set.

2018 BLUEBEAM STUDIO • DECEMBER 11, 2018 • 10 AM - 11 AM

This session is designed to introduce new users to Bluebeam Studio™. Users will learn the possibilities of document management using Studio Projects, as well as how to collaborate using Studio Sessions.

2018 REVU DOCUMENT CONTROL • FEBRUARY 5, 2019 • 10 AM - 12 PM

This session is designed to help you organize and manage your documents over the course of a project. You'll be introduced to key features in Revu® to help you navigate through drawings faster, detect changes and manage revisions. This course covers AutoMark, hyperlinking, document comparison, slip sheeting and Sets.

2018 REVU MEASUREMENTS AND TAKEOFFS - ESSENTIALS • MARCH 26, 2019 • 10 AM - 12 PM

In this session, you will learn to use the measurement tools in Revu® for takeoffs. The course begins with the basics, such as setting up your interface for takeoffs and calibrating your drawing sets. The focus then shifts to learning to use the various measurement tools Revu offers for takeoffs purposes, as well as how to export data for estimation.

2018 REVU MEASUREMENTS AND TAKEOFFS - EXPANDED • APRIL 16, 2019 • 10 AM - 12 PM

In this session, you will learn to use the advanced measurement tools in Revu® for more efficient and effective takeoff workflows. You will expand your knowledge and take advantage of the new measurement features in Revu 2017, such as the Polylength tool, Custom Counts, Dynamic Fill, Quantity Link and more.
